Sources:

- Town highway locations were digitized from 1989 1:5000 orthophotos by Greenhorne & O'Mara Inc. under contract with OGIS. Some road locations were updated by microDATA using GPS during data collection for Enhanced 9-1-1. Other road locations were corrected by WRC GIS staff in 2006 using rights-of-way locations as shown on the VGIS 1:5000 PARCEL coverage. Information for these latter corrections were provided by officials from the Town of Guilford.

- Town highway attributes (i.e. class and pavement) are from AOT highway maps. These data were corrected by WRC GIS staff using information provided by officials from the Town of Guilford.

- Road names data were provided by the Town of Guilford.

- Surface waters are from the Vermont Hydrography Dataset (VGIS data layer SWmmmmmm). The dataset was generated at a scale of 1:5000 and was developed using digital orthophotos, topographic maps, color infra-red aerial photography and other ancillary data sources.

- Structure locations were captured using Global Positioning System technology by microDATA, St. Johnsbury, VT for Vermont's Enhanced 9-1-1 program. Locations have been edited by Windham Regional Commission in 2005 and 2009 using 2000 Vermont digital orthophotos, 2003 and 2008 National Agricultural Imagery Program orthophotos, and information from the Town of Guilford. Structure information should be current to 2008.
