

# Coyotes

## Biology, Management, and Co-existence

Coyotes came into Vermont somewhere around the 1940s and they are here to stay. Are they part wolf? Do they breed with dogs? What is their place now in the ecosystem and near our homes and farms?

Kim Royar of the Vermont Department of Fish and Wildlife will discuss the latest understanding of one of Vermont's largest wild predators, with question and answer time to follow.

Wednesday, January 8, 2020, 7-8:30pm

Broad Brook Community Center

3940 Guilford Center Road, Guilford

All are welcome

**Sponsored by the Guilford Conservation Commission**

*Note: Kim will also present her coyote talk to Guilford Central School students earlier in the day.*
